### Please note!

In some versions of Photoshop you may see alert message about missing font even after installing Montserrat and PT Serif. If you already downloaded and installed the fonts used in Baikal, just press the Replace button. In that case, the fonts should be displayed correctly, even if you have another version of the font. If you didn't install Montserrat and PT Serif, well... Go on and do it!

### Please note!

The following files are compatible with the latest version of Sketch – 3.3. If you have an older version you need to update it. In some versions of Sketch you may experience incorrect display of text layers due to a program bug.
